

MANAGEMENT INVOLVEMENT

Safety Policy

Wellsite Geologists is committed to the health and safety of all employees, contractors, clients, and the public. The ultimate goal of our health and safety policy is to have an accident free environment and protection from accidental loss. All employees of Wellsite Geologists are responsible for ensuring that the safety program is continually updated and maintained. Employees at every level are responsible and accountable for our overall safety initiatives. We take responsibility in upholding this commitment by:

- Complying with applicable safety law, government regulations, industry standards, and our own policies. Exercise sound judgment and common sense when undertaking any work related tasks.
- Making safety considerations an integral part of our planning process.
- Remaining sensitive to the concerns of the public.
- Identifying and mitigating the adverse impacts of our operations on the environment in keeping with good environmental and business practices.
- Responding to safety emergencies in a prompt and efficient manner.
- Committing sufficient resources to ensure that its employees are fully informed of their responsibilities and are trained in safety while performing their duties.
- Taking an active approach to understanding any potential health, safety or environmental issues that may pertain to work undertaken as an employee or contractor of Wellsite Geologists.

All Wellsite Geologists employees and contractors are responsible for obeying all safety rules, following recommended safe work procedures, wearing and using personal protective equipment when required, participating in safety training programs and informing supervisors of any unsafe work conditions. Do not participate in any activities you deem unsafe; you have the right to refuse unsafe work. You are not expected to sacrifice the safety or well-being of personnel for expediency or any other reason.

Management, employees, and contractors are all committed to meeting this policy, now and in the future.

President - Dennis Labrecque

Guiding Principles

Petroleum Industry Guiding Principles For Worker Safety

We, the members of the petroleum industry, have a responsibility to protect all workers engaged in its activities from personal injury and health hazards. To meet our responsibility we will operate under the following guiding principles:

RESPONSIBILITY

The operating company, when acting as prime contractor, is responsible for coordination and general supervision of all activities at the worksite, including activities carried out by contractors, subcontractors, service companies and suppliers. While all parties have a responsibility to promote worker safety, the operating company recognizes its leadership role in promoting worker health and safety on the basis that it has the greatest power to influence worksite situations. It is the responsibility of workers and employers to refuse to perform unsafe work practices.

PRIORITY

Activities will be conducted on the basis that safety of all personnel is of vital importance, whether those personnel are employed by an operating company, a contractor, a subcontractor, a service company or a supplier.

RECOGNITION

The process of selecting contractors, subcontractors, service companies and suppliers, and the administration of contracts, will include recognition and support of good safety performance. Support and recognition based on good safety performance will also be provided by all employers to their employees.

IMPROVEMENT

The operating company, in cooperation with service companies within the industry, will promote methods and practices that have potential for improving safety performance.
